If pet is currently experiencing a problem, how long has it been occurring?

After discussing the reason for your pet's visit with a veterinary technician, we will admit your pet and care for him or her until a doctor is able to perform the necessary exam and/or treatments. To provide the best care for your pet, you may be charged a day admission fee of up to \$15. This day admission care includes a clean cage/kennel/run, bedding, and water. Depending on the length and nature of the visit, your pet may also be offered food and dogs may be walked outside.
